| ◆ Languages Known | : Core JAVA |
| ◆ Framework | : Cucumber |
| ◆ Database | : MySQL |
| ◆ Browser | : Chrome, IE, FF |
| ◆ Defect Tracking Tools | : JIRA |
| ◆ RPA | : UiPath |

Project Profile

Savista Global Solutions Pvt Ltd (Chennai)

Project 1 - Automation / Manual Testing

Savista is an healthcare (RCM) Industry - I had worked on many different projects like

Automated

- 1) Billing (MBMS) - Insurance Billing, Payment batch upload
- 2) Candidate & Food feedback - Feedback on interview process and daily meal
- 3) Transport - Allocating route, cab assigning
- 4) Online test application - Examination tool

Manual

- 5) Coding(nSolve) - Patient chart Coding, allocation,
- 6) HRMS (HR management system) - From candidate applying job to onboarding
- 7) User activity tracking tool (DXC - Screen connect) - User login, logout, idle
- 8) ENat – Application which is used for track users daily tasks

RPA - UiPath

- 9) Removes Bot Temp log file on daily basis triggered at particular time
- 10) Read files using OCR engine based on the keyword in page prediction and mapping happens

Development

- 1) created a Feedback application that works based on the users GPS coordinates

I had performed both manual testing (70%) and Automation testing (30%) in these web applications end to end Automation Framework Cucumber build from the scratch on POM, Katalon testing build from scratch, all test cases are maintained in excel

- Understanding the Requirement and planning for Test scenarios and verifying the scope for automation.
- Responsible for preparing test scenarios and writing test scripts in excel to perform regression and functional testing.
- Identify the test cases that need to be automated using Selenium Web driver.
- Working closely with developers, to understand and create logics for web application.
- Identify the bugs and report the defects to development team through You track.
- Re-testing the resolved defects and updating the tracker.
- After Sanity i perform Regression testing to check the existing functionality with newly added functionality.
- Some minor UI changes are verified manually in live environment
- Frequently changes required software tests are done manually
- once Developer deployed in UAT I will share the test case with entire team for approval then testing performed
- After all the bugs was fixed retesting done frequently finally regression testing on entire module and test case will be shared for signoff

Project Profile

Crown Solutions India Private Limited (Chennai)

Project 1 - Automation testing

RBC (Royal Bank of Canada) -This project is a Canadian multinational financial services company and the largest bank in Canada. The Modules which I have handled are User Log in, sign up, Profile page, Buy and Sell stocks, Sell and Buy stocks, Options trading, Equity, Mutual funds page, Payment page.

- Analyzing the User Stories and planning the user Stories to be completed in particular sprint, test manually and identify the defects.
- Responsible for preparing test scenarios and writing test scripts for regression and functional testing using Excel.
- Identify the test cases that need to be automated using Selenium Web driver.
- Inspect the X-path of the Web element.
